

## Who We Are

Plain Black Corporation is the maker of WebGUI, a popular open-source content management system, and provides comprehensive support and training to its users. Plain Black also provides custom development and hosting services. Once a project is launched, Plain Black offers on-site training and support options to ensure the client's success.

## Services

- Development: Plain Black offers custom development.
- Hosting: Plain Black offers agency hosting and server packages.
- Training: Plain Black offers both onsite and online training. Books authored by Plain Black staff are also available.
- Support: support options include staffed message boards, phone support, and signature Rock Star Support
